

SEAT HEATER SYSTEM

DESCRIPTION

- The settings of the seat heater system vary depending on the destinations and grades. For details, see the equipment list in the Model Outline (see page MO-33).
- A seat heater switch with a built-in indicator light for checking the heater operation is provided.
- A heater control knob for front seats is a stepless temperature adjustment type.
- The output temperature of the seat heater is controlled by a thermostat and thermistor that are enclosed in the seat cushion.
